# The latest EPC prices for energy storage

## Overview

---

By December 2024, average EPC prices stabilized around 1.194¢/Wh [8], proving even freefalls need safety nets. What's Fueling the Price Wars?

Four key drivers are reshaping EPC economics:.

By December 2024, average EPC prices stabilized around 1.194¢/Wh [8], proving even freefalls need safety nets. What's Fueling the Price Wars?

Four key drivers are reshaping EPC economics:.

In 2024 alone, China added enough new energy storage capacity to power 78 million smartphones simultaneously [1]. But here's the kicker: while everyone's racing to build these mega-projects, EPC prices have been doing the limbo – how low can they go?

Let's dissect the latest price wars and market.

This report comes to you at the turning of the tide for energy storage: after two years of rising prices and supply chain disruptions, the energy storage industry is starting to see price declines and much-anticipated supply growth, thanks in large part to tax credits available via the Inflation.

Home and business buyers typically pay a wide range for Battery Energy Storage Systems (BESS), driven by capacity, inverter options, installation complexity, and local permitting. This guide presents cost and price ranges in USD to help plan a budget and compare quotes. The information focuses on.
