# **Turkish Industrial Energy Storage Cabinet System**

## Overview

---

What is Turkey doing in energy storage?

Turkey is aligning with the global trend of grid-scale storage and smart grid applications in energy storage technology. Several projects are planned, leveraging Turkey's advantageous position in renewable energy resources.

Is Turkey establishing a market for large-scale energy storage?

The latest announcement is a big step towards establishing a market for large-scale energy storage in the country, Energy-Storage.news heard from Korkut Öztürkmen, board member at Aksa Energy, one of Turkey's largest independent power producers (IPPs).

What is a storage amendment in Turkey?

The amendment should be interpreted as a type of incentive provided by the state to investors to establish storage facilities. With the steps taken to shape storage legislation, significant investments have started to be made in Turkey for the establishment of storage facilities.

Where is Turkey's first solar power plant located?

In 2018, Turkey's first large-scale battery plant was established in Manisa, integrated with a wind power station. During the following year, Turkey's first grid-connected solar energy and storage facility came into operation in Konya, showcasing simultaneous solar energy generation and battery storage.

Are storage activities legal in Turkey?

The first legal provision on storage activities in Turkish law was introduced with the subparagraph (e) added to Article 14 of the Electricity Market Law No 6,446 (EML) with the amendment dated 21 March 2018. With the relevant amendment, storage activities have been regulated as an activity which can generally be conducted without a licence.

Will Turkey achieve its smart grid ambitions by 2035?

Aligned with the Turkey Smart Grids 2023 Vision and Strategy Determination Project, developed by the Electricity Distribution Services Association in collaboration with the Energy Market Regulatory Authority, Turkey aims to realise its smart grid ambitions by 2035.
