

SolarTech Power Solutions

Turkmenistan solar folding container for sale and wholesale

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What is a mobile solar container?

Mobile Solar Container is also a great storage option for PV panels while not in use. Automatic hydraulic systems. It wouldn't be possible to create such a convenient system without the highest quality hydraulics. The entire system is designed by our engineers with long-standing experience in special mobile constructions.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarfold container?

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solarfold PV power plants.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the

solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

How much solar area does a mobile solar container offer?

Up to 70 m² PV area. Our Mobile Solar Container is available in version 20'. It offers a vast solar area of up to 700m². One person in 15 minutes. It is really that fast to prepare the container. It is especially useful in bad weather when you can quickly fold the panels to prevent any potential damage.
