

Turkmenistan wants to offer solar power for home use

Overview

The country has laid out projects to actively extend electrification from grids harnessed by renewable energy sources, such as solar and wind power, to supply electricity to settlements located on the outskirts of the country. Does Turkmenistan have an electric power industry development plan?

"Turkmenistan Adopts Electric Power Industry Development Plan". CACI Analyst. Archived from the original on 15 April 2021. Retrieved 15 March 2021. ^ Curtis, Glenn (1996). Turkmenistan: A Country Study. Washington DC: The Library of Congress. Archived from the original on 13 June 2011. Retrieved 2 February 2021.

How to assess wind energy resources in Turkmenistan?

To assess wind energy resources within Turkmenistan, wind speed values at different heights are used. Wind directions, repeatability, strength and speed were determined.

How will Turkmenistan transition to a digital system?

The support for this process is directed by the Decree of the President of Turkmenistan adopted in 2020, which approved the "Program for the Transition of the Sphere of Science in Turkmenistan to a Digital System for 2020-2025", highlighting the tasks of ensuring the integrity of academic science, higher education and production.
