Tuvalu Space-Based Solar Base Station

Overview

Tuvalu, an island country midway between Hawaii and Australia, has commissioned a new solar and storage project with the ADB, featuring a 500 kW on-grid solar rooftop array and a 2 MWh BESS in the capital, Funafuti. What is ADB's new solar project in Tuvalu?

“The project is under the Pacific Renewable Energy Investment Facility and has a \$6 million support. It is ADB’s first for Tuvalu’s energy sector,” the ADB said in a statement. “The project also installed solar PV in the outer islands of Nui, Nukufetau, and Nukulaelae.”.

How much energy does Tuvalu use a year?

Like many Small Island Developing States (SIDS), Tuvalu has been heavily reliant on imported fuel for its diesel-based power generation system. Through this new FSPV system 174.2 megawatts per hour of electricity will be generated each year, meeting two percent of Funafuti’s annual energy demand.

What is Tuvalu doing with the ADB?

Tuvalu, an island country midway between Hawaii and Australia, has commissioned a new solar and storage project with the ADB, featuring a 500 kW on-grid solar rooftop array and a 2 MWh BESS in the capital, Funafuti. “The project is under the Pacific Renewable Energy Investment Facility and has a \$6 million support.

Could a new power station capture solar energy from space?

However, the Asian giant is exploring a different approach to energy harvesting – capturing clean, essentially endless solar power where it is most abundant. Chinese researchers are working on a new power station project that could gather and convert solar energy directly from space.

Could a solar power station convert solar energy directly from space?

Chinese researchers are working on a new power station project that could gather and convert solar energy directly from space. The station would be 1 kilometer wide.

Why is China investing in a space solar power station?

China is investing in SBSP to secure a continuous and sustainable source of renewable energy, reduce dependence on fossil fuels, and lead the global clean energy race. The space station could provide power 24/7 and help meet rising energy demands. Is China's space solar power station safe for humans and the environment?
