

**SolarTech Power Solutions**

# **Türkiye's solar energy storage solution**

## Overview

---

How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

Where does Türkiye invest in energy storage?

Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe. Tokcan highlighted the importance of local expertise in manufacturing, system management, and maintenance to avoid dependency on foreign firms.

What is Turkey doing in energy storage?

Turkey is aligning with the global trend of grid-scale storage and smart grid applications in energy storage technology. Several projects are planned, leveraging Turkey's advantageous position in renewable energy resources.

Where is Turkey's first solar power plant located?

In 2018, Turkey's first large-scale battery plant was established in Manisa, integrated with a wind power station. During the following year, Turkey's first grid-connected solar energy and storage facility came into operation in Konya, showcasing simultaneous solar energy generation and battery storage.

What is the future of energy storage?

Moreover, there have been significant investments in battery technologies, specifically targeting the storage and the effective use of energy from volatile sources such as wind and solar power. Various projects are underway to integrate energy storage systems into smart grid infrastructure.

Can Türkiye become a regional hub for battery technology?

“We believe Türkiye can become a regional hub for battery technology, and our government is committed to making this a reality,” Tokcan said. These efforts will position Türkiye as a leader in energy storage innovation, fostering collaboration and supporting renewable energy goals.
