Overview

Who is solar electric supply?

Solar Electric Supply is the most experienced remote industrial solar design firm in the United States. More SES MAPPS® systems have been installed word-wide than any other packaged solar system. Our staff has over 40 years experience designing reliable solutions to remote power needs.

What is a remote solar power system?

Solar Illuminations' standalone remote solar power systems are great renewable energy solutions for powering small electronics in remote sites, or areas difficult to access grid power.

What is the Remote Power System?

The Remote Power System from Mr. Solar® is a kit designed to provide AC power to remote cabins or off-grid locations. It is specifically designed for three mid-size 72 cell panels (24V).

What is a Mapps® solar power system?

MAPPS® are complete pre-wired solar power systems for remote, off-grid applications. Our pole, pad, and ground-mounted solutions provide reliable, industrial-grade solar power for a variety of industries. C1D2 & UL available. Contact Us Today!.

What types of solar power systems are available?

Pad & Pole-mounted, Class 1 Div 2, Microgrid and AC/DC UPS solar battery enclosure systems. Solar Electric Supply's MAPPS® are stand-alone solar power systems, engineered to support a wide variety of remote power requirements.

What is an off-grid remote solar power system?

These off-grid standalone remote solar power systems can be DC or AC power with the use of a power inverter. They can be used as an backup power, and emergency power for when/if grid tie power fails, or can be used as a permanent energy source for remote locations.
