

SolarTech Power Solutions

Ukrainian solar water pump inverter equipment

12V 10AH

Overview

What is a solar pump inverter?

It consists of the solar array, solar pump inverter, water pump and other equipment. The whole system will draw the DC energy from sun through the solar array. Then the solar pump inverter will convert it to AC power for driving the water pump for agricultural irrigation, water supply, animal husbandry, desert control and etc.

What is solar pumping system?

Solar pumping system is a kind of solar off-grid application. It consists of the solar array, solar pump inverter, water pump and other equipment. The whole system will draw the DC energy from sun through the solar array.

Is a solar pump inverter a good choice?

With its advanced features and reliable performance, a solar pump inverter is an excellent choice for those seeking to harness the power of the sun for their water pumping needs. The Sunmoy solar pump inverter offers several advantages over traditional water pumping solutions and other solar pump inverters, including:

What is a sunmoy solar pump inverter?

The Sunmoy solar pump inverter offers several advantages over traditional water pumping solutions and other solar pump inverters, including: High efficiency: The Sunmoy solar pump inverter uses advanced MPPT technology to optimize power output and maximize the efficiency of solar panels, resulting in high energy efficiency.

What is PiS series frequency inverter special for solar water pump?

PiS series frequency inverter special for solar water pump adopts the high accuracy fast MPPT algorithms, tracking the PV array output by the maximum power point, driving the pump motor as much as possible to meet various

pumping applications. The frequency inverter special for solar water pump can support AC input besides support PV array DC input.
