

SolarTech Power Solutions

Uzbekistan quality assurance battery cabinet production

Overview

What is a quality audit for the battery industry?

Our range of quality audits for the battery industry include: Our product inspection for batteries include: First-article inspections (at the beginning of the production) to verify that the quality matches your requirements. In-process inspection to ensure that the processes and techniques used to manufacture batteries are followed.

Why is quality management important in battery manufacturing?

What we are seeing across the battery manufacturing landscape is an extraordinary drive to meet unprecedented demand, and this environment makes digital solutions essential to achieving quality, cost, volume and delivery targets. Quality management is at the heart of these efforts.

How can a holistic quality program improve battery production?

Auto-translate it into: As the energy transition and electrification of mobility drive the explosive demand for batteries, Christophe Mazeaud, director of Battery Industry Solution, Siemens Digital Industries Software, discusses the key role that a holistic quality program plays in scaling and stabilizing battery production.

What are the challenges of battery production?

The second challenging characteristic of the industry is the need for scalability. A battery production ecosystem, whether newly built or an existing factory, must be capable of scaling rapidly without undermining battery quality.
