

SolarTech Power Solutions

Vietnam Solar Panel Project

Overview

November 3, 2025 – SolarBK, a pioneer in Vietnam's renewable energy industry for nearly 20 years, together with Banpu NEXT, a leading provider of clean and Net Zero energy solutions in the ASEAN region, and Amata VN, one of Vietnam's leading industrial park developers, announced a strategic partnership to develop rooftop solar systems with a total expected capacity of 227 MW at Amata City Ha Long and Amata City Long Thanh. Why is the Vietnam solar panel market growing?

The Vietnam solar panel market is witnessing significant growth, driven by increasing energy demands, government support for renewable initiatives, and a shift towards sustainable energy sources.

Does Vietnam have a solar energy strategy?

Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy. By 2030, the country aims to generate 16% of its energy from solar, driven by substantial investments in solar farms across the nation.

Why does Vietnam have a solar energy boom?

Vietnam has undergone one of the largest solar booms in Asia. This boom results from favourable government policies, rapidly growing energy demand and ideal conditions for solar energy. The country's updated Power Development Plan 8 will continue this trajectory, with solar making up most of the country's energy supply by 2050.

Does Vietnam have a solar power industry?

Vietnam's solar power industry has grown rapidly since 2017, driven by generous feed-in tariffs and strong government support. The country now has one of the highest installed solar capacities in Southeast Asia, contributing significantly to its renewable energy goals. 2. What challenges is Vietnam's solar power sector facing?

Does Vietnam need solar power?

Vietnam is rapidly increasing its reliance on solar power, with plans to generate 16% of its energy from solar by 2030. This shift is driven by significant investments in solar farms across the country. Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy.

Why is solar energy important in Vietnam?

Driven by surging energy demand, economic growth and the looming threats of climate change, Vietnam has recognised solar energy as a critical solution for securing its energy future. As a result, solar energy is a cornerstone of the country's updated Power Development Plan (PDP8), which aims to reach 73 GW of capacity by 2030.
