

## SolarTech Power Solutions

# What are the energy storage power stations in Jordan

### DISTRIBUTED PV GENERATION + ESS

## Overview

---

What opportunities are there in the energy sector in Jordan?

**Energy Technologies:** Jordan is exploring energy storage solutions, which may also present opportunities for the U.S. energy sector. Technologies and services related to efficiency gains, including smart metering and grid management, may also find opportunities.

What is the largest power station in Jordan?

The Aqaba Thermal Power Station is the largest power station in Jordan, with a total generation capacity of 656 MW. It consists of five steam turbines units (5 x 130 MW) and two hydraulic turbines (2 x 3 MW). The power station is fueled by natural gas and fuel oil.

How many power plants are in Jordan?

Jordan has 33 utility-scale power plants in operation, with a total capacity of 4703.5 MW. This data is a derivative set of data gathered by source mentioned below. Data and information about power plants in Jordan plotted on an interactive map.

What are the potential opportunities in the Gulf of Aqaba Project?

The following are potential opportunities that are either in process or in the pipeline over the medium term: The \$2.9 billion project will provide 300 million cubic meters of desalinated water from the Gulf of Aqaba to Amman per year. The NCP will be implemented by early 2024 and expected to produce desalinated water by 2028.
