# What are the energy storage power stations in Kazakhstan

## Overview

---

How many power plants are in Kazakhstan?

Kazakhstan has 33 utility-scale power plants in operation, with a total capacity of 18628.0 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

Does Kazakhstan have a unified power system?

Kazakhstan's unified power system operates in a normal mode, in parallel with the power systems of the Russian Federation and Central Asian countries. As of today, 220 power plants are operating in the country, including 144 RES facilities with a total capacity of 2.8 GW.

Could Kazakhstan increase its wind power capacity by 2035?

4 Kazakhstan's vast and cost-efficient wind energy potential offers a particularly strong foundation for scaling up renewable energy capacity. The country could increase its wind power capacity to 10 gigawatts by 2035, twice as much as the government is currently planning – or even more.

What is the project 'unification of energy system of western Kazakhstan with UES?

Under the project "Unification of energy system of Western Kazakhstan with UES of Kazakhstan" construction of power transmission line connecting Western zone with UES of Kazakhstan is considered.

How big is Kazakhstan's electric capacity deficit?

The volume of electric capacity deficit in the Unified Electric Power System of the Republic of Kazakhstan, even taking into account the commissioning of about 4 GW of new capacities, exceeds 6 GW," the Minister noted.

Will Kazakhstan reduce power sector emissions by 35 percent by 2035?

By increasing the share of renewables to 35 percent by 2035, Kazakhstan could reduce power sector emissions by 4 percent compared to 2023 while lowering system costs by 40 percent compared to current plans.
