The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the 100MW battery energy storage project will be able to discharge electricity to the grid particularly during peak demand.

QUEENS, NY —Today, New York City Economic Development Corporation (NYCEDC) and the New York City Industrial Development Agency (NYCIDA) announced the advancement of a key commitment in New York City's Green Economy Action Plan to develop a clean and renewable energy system. NYCIDA closed its.

ALBANY — The New York State Public Service Commission (Commission) today confirmed granting the construction and operation of a battery-based energy storage facility with a capacity of up to 100 megawatts (MW) located in Astoria, Queens. The \$132 million facility will be built by East River ESS.

New York Gov. Kathy Hochul on Aug. 25 announced that New York's first state-owned utility-scale battery energy storage project is now operating in Franklin County, N.Y. The 20-megawatt facility was installed and is operated by the New York Power Authority. The facility will connect into the state's.

Fullmark Energy quietly shuttered Swiftsure, a planned 650-megawatt energy storage system on Staten Island. The biggest battery project in New York has been canceled in a major victory for the nascent nationwide grassroots movement against energy storage development. It's still a mystery why.

What's the Big Deal with Container Energy Storage Systems?

a standard shipping container, the same kind you'd see on cargo ships, quietly humming in a field. But instead of holding sneakers or electronics, it's

packed with cutting-edge tech that stores enough electricity to power a small town.

### What is Container Energy Storage?

Container energy storage, also commonly referred to as containerized energy storage or container battery storage, is an innovative solution designed to address the increasing demand for efficient and flexible energy storage. These systems consist of energy storage.
