

## SolarTech Power Solutions

# Where are the Danish Telecom base stations located

## Overview

---

Where is the airport in Denmark?

The airport is located only 8 kilometres from the Copenhagen city centre and is accessible by car, metro, train and bus. Sweden is only minutes away via the Øresund Bridge. Denmark also has international airports in Billund, Aarhus, Aalborg, Esbjerg and Sønderborg, all located on the peninsula of Jutland.

What is the transport system like in Denmark?

Long distance buses operate between the major cities. Driving a car is easy, and Denmark's roadsystem is connected by 1,100 kilometres of motorway. Bridges linking the peninsula of Jutland and the islands of Funen and Sealand as well as southern Sweden have helped decrease transport times.

Does Denmark have a power grid?

The Danish power grid, connected to that of Norway and Sweden to the north and Germany to the south, has plenty of built-in redundancy, with the option of tapping into neighbouring grids for reserve power, if necessary. Broadband internet is also available almost everywhere in the country, with 98% penetration in 2023.

Does Copenhagen have a metro?

Copenhagen has a local train network, the S-train, with 87 stations throughout the city and its suburbs, plus a Metro that serves the central parts of the city. In the fall of 2019, "Cityringen" opened with 17 new underground metro stops connecting more of Copenhagen with easy access to a metro.
