

Which companies have energy storage power stations in Indonesia

Overview

What is Indonesia's largest integrated solar energy storage project?

Indonesia's largest integrated solar energy storage project--Seetao 200MW+80MWh Indonesia's largest integrated solar energy storage project On July 16, 2025, Morowali Industrial Park in Sulawesi Province, Indonesia welcomed a milestone clean energy project - a 200MW photovoltaic power station with an 80MWh energy storage system.

Why do Indonesian batteries need a battery energy storage system?

Batteries are required to provide constant electricity supply to renewable energy plants, which are primarily intermittent, such as solar and wind power plants. The agreement was made with other state-owned bodies, such as the Indonesian Battery Corporation, to build the Battery Energy Storage System by 2022.

Will Tesla invest in Indonesia's battery energy storage system sector?

There have been talks with Tesla, with plans to invest in Indonesia's Battery Energy Storage System sector. Tesla has an outstanding reputation in its production of technology that is carbon neutral. The BESS produced and used by Tesla has a relatively low negative environmental impact.

Who is involved in the battery energy storage system project?

Subsidiaries of PLN involved in the Battery Energy Storage System project happen to be the primary electricity providers in Indonesia, such as PT Indonesia Power, PT Pembangkitan Jawa Bali, and others. The plan to develop an energy storage system aligns with the positive growth in the renewable energy industry.

What is Indonesia's energy supply plan 2025-2034?

The recently approved National Electricity Supply Plan (2025-2034) by the Indonesian government clearly proposes to increase the proportion of

renewable energy from the current 12% to 35% by 2034, with a target of 17.1GW of photovoltaic power generation installed capacity and planned supporting 3GW energy storage facilities.

How much solar irradiance does Indonesia receive a day?

Indonesia receives 4.5–6.5 kWh/m²/day of solar irradiance—ideal for solar + battery solutions. Store excess solar energy during the day and use it during night or outages—supporting energy independence and clean development.
