Overview

With a professional team and more than 20 years of focus on the new energy industry, we are far ahead in the technology field and have developed into a professional manufacturer with considerable scale and technical strength.

With a professional team and more than 20 years of focus on the new energy industry, we are far ahead in the technology field and have developed into a professional manufacturer with considerable scale and technical strength.

Woteam Group (Myanmar) Co., Ltd. is an import and export trading enterprise specializing in new energy electric vehicles, portable energy storage, household energy storage, small and large-scale industrial and commercial energy storage, smart home appliances, and other industries. Jointly with.

PHILOS is a membrane manufacturing company that has been creating membrane-related products and systems for almost two decades. The company's major focus is on hollow fiber, MBR, and UF membranes, but it also designs and manufactures hydrogen fuel . Humidor is a membrane humidifier module which.

Myanmar's renewable energy sector is growing at 14% annually, driven by solar projects needing reliable thermal management. Liquid cooling plates have become critical for battery systems in this tropical climate – but who are the key players shaping this niche?

Ambient temperatures above 35°C can.

Data Centre Magazine considers some of the leading companies that are committed to developing the best cooling solutions We consider some of the leading data centre companies that are committed to developing the best cooling solutions to power a sustainable industry During an era of huge digital.

The adoption of liquid cooling solutions in Myanmar data centers is on the rise, fueled by the need to address the challenges of power density and energy efficiency. With the growing demand for high-performance computing and AI

applications, traditional air-based cooling methods are proving.

Myanmar, February 8, 2025 – Solis, a global leader in renewable energy, has unveiled a groundbreaking off-grid Battery Energy Storage System (BESS) in Myanmar, marking a significant advancement in sustainable energy solutions. This innovative project reinforces Solis' dedication to reducing.
